SUMMARY

Cybersecurity student at UTSA with hands-on experience delivering technical support at scale, administering Linux systems, and building self-hosted infrastructure. Proven ability to resolve complex hardware, software, and networking issues across multiple platforms, with a track record of high customer satisfaction. Brings strong documentation habits, a security-minded approach to troubleshooting, and a passion for continuous learning.

TECHNICAL SKILLS

Systems: Windows, macOS, Linux (Ubuntu, Debian), iOS, Docker, Proxmox, Git

Networking: TCP/IP, DNS, DHCP, VPN, Firewalls, LAN/WAN, Cloudflare, Network Troubleshooting

Security: Wazuh SIEM, MITRE ATT&CK, Active Directory, Nmap, Wireshark

Programming: Python, Bash, HTML/CSS

Tools: IT ticketing systems, CRM platforms, Remote Desktop, Traefik

EDUCATION

B.B.A. in Cybersecurity | *University of Texas at San Antonio*

Expected Aug 2026

GPA: 3.75 • Relevant coursework: Network Security, Information Assurance, Linux & SQL, Cybersecurity Fundamentals

WORK EXPERIENCE

Technical Support Advisor | *Apple (Remote)*

Jan 2024 – Jul 2025

- Served as first point of contact for customers, delivering remote technical support across Mac, iPhone, iPad, and Apple Watch, resolving 150+ cases weekly across hardware, software, and account issues
- Maintained a 97% customer satisfaction rating by providing empathetic, efficient, and accurate solutions in a high-volume environment
- Diagnosed and resolved complex OS-level, network connectivity, and account security issues, applying systematic troubleshooting methodology
- Leveraged IT ticketing and CRM platforms to manage cases, track resolutions, and ensure accurate documentation and timely follow-up

Head Cashier | *The Home Depot — Boerne, TX*

Jan 2021 – Present

- Supervised cashier team and oversaw thousands of weekly transactions in a high-volume retail environment
- Trained new employees on POS systems, compliance procedures, and customer engagement, reducing onboarding errors and improving team efficiency
- Served as primary point of escalation for customer issues and POS technical failures, consistently resolving problems under time pressure
- Maintained composure and accuracy managing competing priorities across a fast-paced, customer-facing environment

PROJECTS

Security Home Lab — *Proxmox, Docker, Wazuh, Active Directory*

- Built and maintain a multi-VM home lab on Proxmox, running containerized services via Docker and Traefik reverse proxy with Cloudflare Tunnel for secure external access
- Deployed Wazuh SIEM for log aggregation and threat detection across lab infrastructure, gaining hands-on experience with security monitoring and alerting
- Configured an **Active Directory lab** environment to simulate and detect attacks including Kerberoasting, Pass-the-Hash, DCSync, and Golden Ticket attacks using MITRE ATT&CK as a framework
- Documented architecture, configurations, and troubleshooting processes in a portfolio of technical writeups at preahs.com

Self-Hosted Infrastructure Stack — *Linux, Docker, Nextcloud, Jellyfin*

- Designed and deployed a home server stack including Nextcloud for file sync, Jellyfin for media, and ntfy for push notifications, all managed via Docker Compose
- Managed storage migrations, resolved Cloudflare Tunnel trusted-domain issues, and maintained uptime across services with documented runbooks
- Configured Bash scripts and system-level tooling for automated media organization, user account management, and backup routines

CERTIFICATIONS & TRAINING

- CompTIA A+ (220-1201 & 220-1202) — January 2026
- CompTIA Security+ (SY0-701) — In Progress, Expected June 2026
- Tools of the Trade: Linux and SQL — February 2024
- Connect and Protect: Networks and Network Security — April 2024
