SUMMARY

Security+ certified cybersecurity graduate with hands-on Tier 1 technical support experience at scale, Linux administration, and self-hosted cloud-native infrastructure. Skilled at triaging and routing issues in high-volume remote environments, with strong documentation habits and a security-minded approach. Currently building depth in AWS, Kubernetes, and CI/CD pipelines.

TECHNICAL SKILLS

Support & Operations: Tier 1 end-user support, ticket triage & escalation, IT ticketing systems, runbooks & SOPs

Systems & Virtualization: Windows, macOS, Linux (Ubuntu, Debian), iOS, Proxmox VE

Cloud, Containers & CI/CD: Docker, Docker Compose, Cloudflare, Git, Forgejo/GitHub CI, Prometheus & Grafana

Networking: TCP/IP, DNS, DHCP, VPN (WireGuard, Tailscale), Cloudflare Tunnels, firewalls, LAN/WAN, network troubleshooting

Security: MITRE ATT&CK, Nmap, Wireshark, zero-trust remote access, NIST 800-53 / CSF

Programming & Scripting: Python, Bash, HTML/CSS

EDUCATION

B.B.A. in Cybersecurity | *University of Texas at San Antonio*

Aug 2026

GPA: 3.75 • Relevant coursework: Network Security, Information Assurance, Linux & SQL, Cybersecurity Fundamentals

WORK EXPERIENCE

Technical Support Advisor | *Apple (Remote)*

Jan 2023 – Jul 2025

- First point of contact across Mac, iPhone, iPad, and Apple Watch, resolving 150+ cases weekly spanning hardware, software, OS-level, network connectivity, and account/access issues.
- Triageed, categorized, and routed incidents, resolving at first contact where possible and escalating complex cases with clear, documented handoffs.
- Managed cases end-to-end in IT ticketing and CRM platforms, maintaining accurate documentation and timely follow-up.
- Sustained a 97% customer satisfaction rating in a high-volume, fully remote, asynchronous support environment.

Head Cashier | *The Home Depot — Boerne, TX*

Jan 2021 – Present

- Primary point of escalation for customer issues and POS/technical failures, resolving problems accurately under time pressure.
- Trained new staff on POS systems and compliance procedures while overseeing thousands of weekly transactions, reducing onboarding errors.
- Created a standardized closing checklist for head cashiers, eliminating recurring register-closing discrepancies.

CERTIFICATIONS & TRAINING

- CompTIA Security+ (SY0-701) — June 2026
- CompTIA A+ (220-1201 & 220-1202) — January 2026

PROJECTS

Self-Hosted Infrastructure Platform — *Proxmox, LXC, Docker, Prometheus/Grafana, Cloudflare Tunnels, WireGuard*

- Operate a Proxmox host running 25+ containerized services across LXC and Docker, managing capacity, updates, and backups.
- Deployed a Prometheus, Grafana, and Alertmanager stack for infrastructure health and uptime, building dashboards and routing alerts through a self-hosted ntfy service.
- Secured administrative and external access without exposing inbound ports, combining Cloudflare Tunnels with WireGuard and Tailscale for encrypted connectivity.
- Authored incident runbooks to formalize triage steps and reduce resolution time, and automated backups and account management via Bash.

CI/CD Pipeline with Security Scanning — *Forgejo, Trivy, Gitleaks, Docker Compose, Git*

- Run a self-hosted Forgejo instance with CI pipelines, keeping Docker Compose service definitions and infrastructure configuration under GitOps-style version control, mirrored to GitHub.
- Integrated Trivy image scanning and Gitleaks secret detection into CI pipelines, catching vulnerable dependencies and committed credentials before deployment.
